

# Satisfyer

## Instructions for use: Satisfyer – Disinfectant Spray

### Satisfyer Disinfectant Spray

Satisfyer Disinfectant Spray is a disinfectant spray developed especially for the Satisfyer pressure wave vibrator. It cleans your toy gently yet thoroughly.

The Disinfectant Spray offers impressive quality thanks to its select raw ingredients, monitored manufacturing processes and comprehensive testing.

### How the Satisfyer Disinfectant Spray works

The Satisfyer Disinfectant Spray provides disinfectant and antibacterial cleansing of your toy and a range of other surfaces. The formula acts gently on your Satisfyer, yet effectively cleanses it of a variety of bacteria, fungi and viruses that can cause or transmit disease.

### Applying Satisfyer Disinfectant Spray

Satisfyer Disinfectant Spray is for use on erotic toys and small, wipeable surfaces. Spray the surface generously (approx. 5-6 pump strokes for 100 cm<sup>2</sup>) and leave to work for 1-2 minutes. Then dry thoroughly with a lint-free cloth. Prior to use, please check material compatibility and colour fastness in a non-visible area. Do not apply the Disinfectant Spray to marble, enamel, brass or other delicate surfaces.

The spray is not suitable for large-scale disinfection.

### Further information

Use biocides safely. Always read the identification and product information prior to use. Keep out of reach of children. Immediately and thoroughly rinse the affected eye(s) with water and consult a doctor. Immediately obtain medical advice if swallowed and present packaging or label. Avoid longer skin contact. Wash hands and gloves/materials well after use. Do not inhale spray mist/aerosols. Vapours can cause drowsiness and lightheadedness. Only use in well ventilated areas. No smoking. Ensure packages are completely emptied before recycling. Take larger product remains to a waste disposal centre.

### Composition

100g of solution contains 0.24g didecyldimethyl ammonium chloride, 0.24g alkyldimethylbenzyl ammonium chloride, 0.24g alkyldimethylethyl ammonium chloride
